

(De)coloniality - Concepts and current debates from an interdisciplinary perspective

Thursday, 10:15-11:45, Hörsaal 7

What does (de)coloniality refer to and how is it used in research and practice? How can it make us rethink our own approaches both in theory and practice and across different fields? How can we apply it in different contexts? To answer these and other questions, we have invited a wide range of scientists, speakers, artists and activists to discuss the impact of decolonial theories in their field and on their work.
